MTConnect	MTConnect device	MTConnect (HTTP)

Other

Interface	Vendor	Product name
DDE Client	Other	Third party DDE Server
DxpLink Client	TAKEBISHI	DeviceXPlorer OPC Server
Shared Memory	Other	Memory Mapped File

DeviceXPlorer OPC Server Annotations

*1	SYSMAC Gateway and CX-Compolet runtime license is required for CX-Compolet connections.
*2	Required for connections other than Ethernet or serial communication. (Peripheral / USB port communication)
*3	JTEKT communication library is required in TOYOPUC Built-in CPU Port connection.
*4	Use "Modbus Connection".
*5	Use "Modbus Connection" to connect with Panasonic FP series via serial communication.
*6	Use "EtherNet/IP Connection".
*7	FANUC "FOCAS1" or "FOCAS2" is required.
*8	It can access PLC registers as Q4ACPU when using "EZSocket connection" "
*9	Not to access directly when using "EZSocket connection". Access through shared memory of iQ platform (multiple CPU system).
*10	Please contact us about communication with NCs older than M5.
*11	Please contact Shibaura Machine about connectivity.
*12	Please contact Shibaura Machine about connectivity because T-PX200 does not carry RS-232C interface.
*13	Use "BACnet Connection".
*14	A base unit (2500B) is required for 2500 series.
*15	Use "Modbus/TCP Server Connection"
*16	Japan Steel Works "NET100 Server" is required.
*17	Contact us if you want to use.
*18	Support OS for MELSEC interface board connection depends on MELSEC interface board supporting OS.
*19	Use "IEC61850MMS Connection".
